CAREER OBJECTIVE

Seeking an entry-level role as python full stack developer, where I can apply my technical skills, analytical abilities, and innovative thinking to add value to the team and as well as organization.

TECHNICAL SKILLS

- Python
- Javascript
- Tailwindcss
- MySQL
- MongoDB
- Bootstrap
- React
- Django REST

PROJECTS

1. KATTAPAI MARKET-GROCERY DELIVERY WEBSITE

TECH STACK: Django REST Framework, MySQL, React.js, Tailwindcss

Built a full-stack grocery delivery web application enabling users to browse, order, and manage groceries online.

- Developed **RESTful API's** in backend using **Django REST Framework** to handle products, user accounts, orders, and payments.
- Designed and implemented a responsive frontend in **React.js** used **Hero-icons, React-icons, Material UI** to standardize design elements and visualization for smooth user interactions across devices.
- To neglect problems like slow notification and multiple referesh of the page, used **Websocket** to fast and real time updates.
- To reduce the risk of unauthorized login and to prevent credential used **Django Token Aunthentication** method and **Django User Models**

2. MOVIES WORLD

TECH STACK: Django, MySQL

Built a full-stack movies website enabling users to browse, watch and download movies online.

- Developed **API's** in backend using **Django URL'S** to handle and direct website pages.
- Designed and implemented a responsive frontend using **Django Templates** and used **Django static files** to store and fetch images and files.
- Created multiple tables in database using **Django Models** to store and maintain movies in the category of Languages and Years.
- Used **Django Admin** to prevent user's Credentials and to maintain history of user's Login sessions, watched movies, download history
